JOSEPH MBUGUA GITAU

Software Developer | Backend Engineer

mbuguajoseph498@gmail.com | +254 705 686 093

PROFESSIONAL SUMMARY

Full-Stack Software Developer with 1+ year of experience building enterprise web applications, e-commerce platforms, and ERP systems. Proficient in Java Spring Boot, Angular, and modern web technologies with a strong foundation in backend development, REST APIs, and microservices architecture. Experienced in developing custom solutions for environmental consultancy, water treatment services, and ride-hailing platforms. Complementary knowledge in IT infrastructure, DevOps practices, and system administration.

TECHNICAL SKILLS

Backend Development: Java, Spring Boot, REST APIs, Microservices, Spring Data JPA, Spring Security, JWT Authentication, WebSocket, RabbitMQ, Python, PHP

Frontend Development: JavaScript, TypeScript, Angular, HTML5, CSS3, Responsive Design, SEO Optimization

Databases: PostgreSQL, MySQL, SQL Optimization, Database Design, Data Modeling

ERP & Enterprise Systems: Odoo ERP (v17/v18/v19), Custom Module Development, CRM, Sales, Inventory, Accounting, Business Process Automation

DevOps & Tools: Docker, Git/GitHub/Bitbucket, CI/CD Pipelines, Maven, Postman, IntelliJ IDEA, VS Code, Linux CLI

IT Infrastructure (Foundational): Windows Server, Linux Administration, Virtualization, Network Management, System Troubleshooting

PROFESSIONAL EXPERIENCE

Software Developer & Systems Administrator

Smoothtel and Data Solutions | October 2024 – Present

- Develop and maintain company software resources, implementing custom solutions and integrating third party applications
- Customize and administer Odoo ERP modules (Sales, CRM, Inventory, Accounting) to streamline business operations
- Build REST APIs and backend services using Spring Boot for internal business applications
- Manage Windows Server infrastructure, virtualization platforms, and enterprise IT systems
- Implement automated workflows, system monitoring, and backup solutions ensuring 99.9% uptime

Software Engineer

Bionix-HSE (Kenya) | July 2024

- Developed full-stack environmental consultancy platform with e-commerce functionality, blog system, and service listings
- Engineered secure RESTful APIs using Spring Boot for user authentication (JWT), profile management, and newsletter subscriptions
- Built admin dashboard for content management with HTML email delivery and subscription handling
- Implemented structured SEO optimization and DevOps pipelines achieving 99.9% uptime

Software Engineer Graduate Trainee

Tangazoletu Limited | February 2024 – May 2024

- Completed intensive enterprise software engineering program focused on Java Spring Boot and Angular
- Designed microservices architecture for financial systems with secure REST APIs and authentication mechanisms
- Developed full-stack features integrating Angular frontend with Spring Boot backend
- Participated in Agile development cycles including sprint planning, daily stand-ups, and retrospectives

ICT Intern

Caritas Microfinance Bank | June 2023 – August 2023

- Provided IT support including hardware troubleshooting, software installations, and system maintenance
- Supported digital banking operations and assisted Credits Department with system operations

EDUCATION

Bachelor of Science in Computer Science

Kirinyaga University | 2020 – 2024

Second Class Honours (Lower Division) | GPA: 3.1

Final Year Project: Bank Products Comparative System - Full-stack application comparing loan products using Spring Boot and Angular

KEY PROJECTS

Norqpro Africa – HSE Compliance & Safety Solutions Platform

Technologies: Odoo (V19).

- Developed Odoo-powered platform for Health, Safety, and Environmental compliance solutions across Africa
- Implemented service catalog for workplace safety, OSHA/NEMA compliance audits, hygiene training, and environmental solutions
- Built e-commerce functionality for safety gear and first aid supplies with inventory management
- Customized Odoo modules for compliance tracking, training management, and client portal functionality.

Ecoviron – E-commerce & Environmental Consultancy Platform

Technologies: Spring Boot, JavaScript, HTML/CSS, PostgreSQL

- Developed full-featured e-commerce platform with product catalog, shopping cart, and blog functionality
- Created RESTful APIs for product management, user authentication, order processing, and content publishing
- Integrated secure payment processing, contact form management, and automated email notifications
- Implemented SEO optimization and responsive UI design for mobile and desktop compatibility

Taka Ride – Waste Collection & Ride-Hailing Platform

Technologies: Java, Spring Boot, PostgreSQL, WebSocket, JWT

- Engineered backend for ride hailing system focused on solid waste collection services.
- Implemented secure JWT authentication with role based access control for drivers and customers.
- Developed real-time location tracking using WebSocket technology for live driver updates.
- Built comprehensive booking system with ride status updates and automated notifications.

CERTIFICATIONS & TRAINING

- Devnet Associate(201 – 900) – CISCO & LinkedIn Learning
- Spring Boot Fundamentals – Amigoscode
- Frontend Development with Angular – freeCodeCamp
- Python Essentials – Cisco Networking Academy
