JOSEPH MBUGUA GITAU

Junior Systems Engineer | Backend Engineer

Email: mbuguajoseph498@gmail.com | Phone: +254 705 686 093

PROFESSIONAL SUMMARY

Junior Systems Engineer and Backend Software Developer with hands on experience in Windows Server administration, enterprise virtualization, network support, and system troubleshooting within a live production environment. Experienced in managing departmental server infrastructure, implementing backup and monitoring solutions, and supporting enterprise communication systems including Cisco and Alcatel Lucent IP telephony.

Strong foundation in networking concepts within the Cisco ecosystem, including packet tracing simulations and structured troubleshooting methodologies. Complemented by a background in backend development (Java Spring Boot, REST APIs, ERP customization), enabling a holistic understanding of infrastructure, system integrations, and application performance.

Actively leverage AI driven tools and automation techniques to enhance operational efficiency, streamline workflows, improve documentation, and accelerate problem resolution. Committed to building secure, scalable, and high performance enterprise systems.

TECHNICAL SKILLS

- **Systems & Infrastructure:** Windows Server, Virtualization, System Administration, Backup & Monitoring, Enterprise Troubleshooting
- **Networking:** Cisco Ecosystem, IP Telephony (Cisco & Alcatel-Lucent), Packet Tracer, Network Troubleshooting
- **Backend Development:** Java, Spring Boot, REST APIs, Microservices, Spring Security, JWT, RabbitMQ
- **Databases:** PostgreSQL, MySQL, Database Design, SQL Optimization
- **ERP Systems:** Odoo (v17/v18/v19), Custom Module Development, CRM, Sales, Inventory, Accounting
- **DevOps & Tools:** Docker, Git, CI/CD, Maven, Linux CLI, Postman, IntelliJ IDEA, VS Code
- **AI & Automation:** AI-assisted debugging, workflow automation, technical documentation optimization

PROFESSIONAL EXPERIENCE

Software Developer & Systems Administrator

Smoothtel and Data Solutions | October 2024 – Present

- Manage Windows Server infrastructure and departmental virtualization environments.
- Implement monitoring, backup, and recovery solutions ensuring high system availability.
- Provide enterprise-wide hardware and software troubleshooting support.

- Administer and customize Odoo ERP modules to streamline business operations.
- Develop backend services and REST APIs using Spring Boot.
- Maintain and troubleshoot Cisco and Alcatel-Lucent IP phone systems.

Software Engineer Graduate Trainee

Tangazoletu Limited | February 2024 – May 2024

- Completed intensive enterprise software engineering training focused on Java Spring Boot and Angular.
- Designed microservices architecture and secure REST APIs.

ICT Intern

Caritas Microfinance Bank | June 2023 – August 2023

- Provided IT support including hardware troubleshooting, software installations, and system maintenance.
- Supported digital banking operations and assisted internal departments with system operations.

EDUCATION

Bachelor of Science in Computer Science

Kirinyaga University | 2020 – 2024

Second Class Honours (Lower Division) | GPA: 3.1

KEY PROJECTS

Norqpro Africa – HSE Compliance & Safety Solutions Platform.

Technologies: Odoo (V19).

• Developed Odoo-powered platform for Health, Safety, and Environmental compliance solutions across

Africa

• Implemented service catalog for workplace safety, OSHA/NEMA compliance audits, hygiene training, and

environmental solutions

• Built e-commerce functionality for safety gear and first aid supplies with inventory management

• Customized Odoo modules for compliance tracking, training management, and client portal functionality.

Ecoviron – E-commerce & Environmental Consultancy Platform

Technologies: Spring Boot, JavaScript, HTML/CSS, PostgreSQL•Developed full-featured e-commerce platform with product catalog, shopping cart, and blog functionality

•Created RESTful APIs for product management, user authentication, order processing, and content publishing

•Integrated secure payment processing, contact form management, and automated email notifications

•Implemented SEO optimization and responsive UI design for mobile and desktop compatibility

Taka Ride – Waste Collection & Ride-Hailing Platform

Technologies: Java, Spring Boot, PostgreSQL, WebSocket, JWT

•Engineered backend for ride hailing system focused on solid waste collection services.

•Implemented secure JWT authentication with role based access control for drivers and customers.

•Developed real-time location tracking using WebSocket technology for live driver updates.

•Built comprehensive booking system with ride status updates and automated notifications.

CERTIFICATIONS and TRAINING

- Cisco DevNet Associate (201-900)
- Spring Boot Fundamentals – Amigoscode
- Frontend Development with Angular – freeCodeCamp
- Python Essentials – Cisco Networking Academy.
